FIRE PROTECTION ENGINEER

Thermal Engineering Corporation is a mechanical engineering consulting firm located in Honolulu, Hawaii. We are seeking an entry level fire protection engineer to become part of a growing fire protection design team within the company.

Position: Entry Level Fire Protection Engineer

Qualifications:

1. Education: Bachelors of Science degree in fire protection engineering or mechanical engineering from an accredited four-year program.
2. US Citizenship: There is no Visa Sponsorship available for this position. All applicants must be US Citizens in good standing.
3. Communication Skills: Excellent communication skills including the ability to write logically and concisely and the ability to speak with other engineers and architects, staff personnel, clients, contractors and vendors.
4. Personal Skills: Highly attentive to detail and quality, self motivated, willingness to travel, team player, goal oriented, and ability to manage time well.
5. Other: Proficiency with Microsoft Excel and Word, project management, and/or consulting experience, are positive advantages.

Applicants with prior engineering experience, including preparation of design drawings, specifications, and cost estimates are a plus. Applicants will be considered who have relevant design experience in government, industrial, or commercial sectors.

Applicants should e-mail a resume and list of current references to Melvin Harano at harano@thermaleng.com. Applicants will be contacted within 30 days of receipt.
